Heavy dragline mats and crane mats

Species	These mats are constructed of Mora, Wamara and Greenheart beams. All the timber species are characterized by hardness and durability.
Seizes	All standard seizees are possible. Starting from 20 cm up to 30cm and lengths from 8 till 11,8 meter.
Usage	Super heavy transport and heavy duty cranes
Specification	The mats are constructed of beams of 20x30cm wide. Steel bolts are 32mm and on request 38mm. All steel bolts have strong washers and nuts. The nuts can be tightened individually
Construction	constructed of sawn beams with tight and neatly boxed hearts every beam with strong nail plates. Other short ends painted. All sides top and bottom chamfered. All crane mats have standard 2 slightly tapered pick holes in the middle beam for easy transport and movement of the mats.
